With the recent changes to Section 60 of the Optician's Act, Sauflon are strengthening their 20 year Optician Only policy by including a unique fully traceable lot number on every contact lens product sold. Sauflon's view is that it is the Eye Care Professionals who generate the contact lens business and therefore should benefit financially from their sale.

Sauflon's promise to the Eye Care Professional is:

***“To manufacture a wide range of the highest quality disposable soft contact lenses, at competitive prices, exclusively available to the Eye Care Professional.”***

With this in mind, Sauflon would like to clarify the use of their name and product brands on the internet.

**Sauflon support the promotion of their products by an eye care professional on their practice/s website and will not supply its products to non optical websites.**

Sauflon would like to thank all Eye Care Professionals for their continuing support and look forward to working together to protect the Eye Care Professionals business.
